Table of Contents Volume 170, 1987

Number 1

C.C. Smart, N. Amrhein: Ultrastructural localisation by protein A-gold immunocytochemistry of 5-enolpyruvylshikimic acid 3-phosphate synthase in a plant cell culture which overproduces the enzyme 1

A. Schröder-Lorenz, L. Rensing: Circadian changes in protein-synthesis rate and protein phosphorylation in cell-free extracts of *Gonyaulax polyedra* 7

L. Vigh, I. Horváth, J. Woltjes, T. Farkas, P. van Hasselt, P.J.C. Kuiper: Combined electron-spin-resonance. X-ray-diffraction studies on phospholipid vesicles obtained from cold-hardened wheats. I. An attempt to correlate electron-spin-resonance spectral characteristics with frost resistance 14

I. Horváth, L. Vigh, J. Woltjes, T. Farkas, P. van Hasselt, P.J.C. Kuiper: Combined electron-spin-resonance. X-ray-diffraction studies on phospholipid vesicles obtained from cold-hardened wheats. II. The role of free sterols 20

J.E. Nester, S. Veysey, R.C. Coolbaugh: Partial characterization of an antheridiogen of *Anemia mexicana:* Comparison with the antheridiogen of *A. phyllitidis* . . . 26

E. Komor, M. Thom, A. Maretzki: The oxidation of extracellular NADH by sugarcane cells: Coupling to ferricyanide reduction, oxygen uptake and pH change 34

I. Duncan, M. Spencer: Changes in respiration of mitochondria isolated from cotyledons of ethylene-treated pea seedlings 44

M.S. Fitter, P.M. Norman, M.G. Hahn, V.P.M. Wingate, C.J. Lamb: Identification of somatic hybrids in plant protoplast fusions with monoclonal antibodies to plasma-membrane antigens 49

R. Gonthier, A. Jacqmard, G. Bernier: Changes in cell-cycle duration and growth fraction in the shoot meristem of *Sinapis* during floral transition 55

D. Reis, B. Vian, D. Darzens, J.-C. Roland: Sequential patterns of intramural digestion of galactoxyloglucan in tamarind seedlings 60

W. Hopp, H.U. Seitz: The uptake of acylated anthocyanin into isolated vacuoles from a cell suspension culture of *Daucus carota* 74

J.P. Knox, M.H. Beale, G.W. Butcher, J. MacMillan: Preparation and characterisation of monoclonal antibodies which recognise different gibberellin epitopes 86

J. Brulfert, M. Kluge, D. Guerrier, O. Queiroz: Characterization of carbon metabolism in *Opuntia ficus-indica* Mill. exhibiting the idling mode of Crassulacean acid metabolism 92

A.J. Greenland, M.V. Thomas, R.M. Walden: Expression of two nuclear genes encoding chloroplast proteins during early development of cucumber seedlings . . 99

I. Struve, U. Lüttge: Characteristics of $MgATP^{2-}$-dependent electrogenic proton transport in tonoplast vesicles of the facultative Crassulacean-acid-metabolism plant *Mesembryanthemum crystallinum* 111

F. Lütke-Brinkhaus, H. Kleinig: Carotenoid and chlorophyll biosynthesis in isolated plastids from mustard seedling cotyledons (*Sinapis alba* L.) during etioplast-chloroplast conversion 121

J.L. Garcia-Martinez, V.M. Sponsel, P. Gaskin: Gibberellins in developing fruits of *Pisum sativum* cv. Alaska: Studies on their role in pod growth and seed development 130

M. Gleizes, B. Camara, J. Walter: Some characteristics of terpenoid biosynthesis by leucoplasts of *Citrofortunella mitis* 138

D.R. Pareddy, R.I. Greyson, D.B. Walden: Fertilization and seed production with pollen from in-vitro-cultured maize tassels (*Short Communication*) 141

Number 2

A.M.C. Emons, N. van Maaren: Helicoidal cell-wall texture in root hairs 145

H. Schwarz, H.A.W. Schneider: Immunological assay of phytochrome in small sections of roots and other organs of maize (*Zea mays* L.) seedlings 152

R.J.A. Connett, D.E. Hanke: Changes in the pattern of phospholipid synthesis during the induction by cytokinin of cell division in soybean suspension cultures 161

U. Kutschera, R. Bergfeld, P. Schopfer: Cooperation of epidermis and inner tissues in auxin-mediated growth of maize coleoptiles 168

A. Yokota, S. Kitaoka: Rates of glycolate synthesis and metabolism during photosynthesis of *Euglena* and microalgae grown on low CO_2 181

T.-T. Wang, S.F. Yang: The physiological role of lipoxygenase in ethylene formation from 1-aminocyclopropane-1-carboxylic acid in oat leaves 190

P.S. Kerr, S.C. Huber: Coordinate control of sucrose formation in soybean leaves by sucrose-phosphate synthase and fructose-2,6-bisphosphate 197

Th. Sommer, F. Degli-Innocenti, V.E.A. Russo: Role of nitrogen in the photoinduction of protoperithecia and carotenoids in *Neurospora crassa* 205

K. Datta, H. Parker, V. Averyhart-Fullard, A. Schmidt, A. Marcus: Gene expression in the soybean seed axis during germination and early seedling growth . . . 209

L. Faye, M.J. Chrispeels: Transport and processing of the glycosylated precursor of Concanavalin A in jackbean 217

P. Schloß, C. Walter, M. Mäder: Basic peroxidases in isolated vacuoles of *Nicotiana tabacum* L. 225

L.C. Morejohn, Th.E. Bureau, L.P. Tocchi, D.E. Fosket: Resistance of *Rosa* microtubule polymerization to colchicine results from a low-affinity interaction of colchicine and tubulin 230

G. Roblin, P. Fleurat-Lessard: Redistribution of potassium, chloride and calcium during the gravitropically induced movement of *Mimosa pudica* pulvinus . . . 242

D.G. Heathcote, B.W. Bircher: Enhancement of phototropic response to a range of light doses in *Triticum aestivum* coleoptiles in clinostat-simulated microgravity 249

H. Jones, R.A. Leigh, A.D. Tomos, R.G.W. Jones: The effect of abscisic acid on cell turgor pressures, solute content and growth of wheat roots 257

J.W. Payne, D.J. Walker-Smith: Isolation and identification of proteins from the peptide-transport carrier in the scutellum of germinating barley (*Hordeum vulgare* L.) embryos 263

M.R. Blatt: Electrical characteristics of stomatal guard cells: The ionic basis of the membrane potential and the consequence of potassium chloride leakage from microelectrodes 272

Number 3

A. Schulz: Sieve-element differentiation and fluoresceine translocation in wound-phloem of pea roots after complete severance of the stele 289
G. Casadoro, N. Rascio: Cotyledonal chloroplasts in the hypogeal seeds of clementine 300
K. Toriyama, T. Kameya, K. Hinata: Selection of a universal hybridizer in *Sinapis turgida* Del. and regeneration of plantlets from somatic hybrids with *Brassica* species 308
M.R. Samson, F.M. Klis, W.L. Homan, P. van Egmond, A. Musgrave, H. van den Ende: Compositon and properties of the sexual agglutinins of the flagellated green alga *Chlamydomonas eugametos* 314
F. Schuring, J.W. Smeenk, W.L. Homan, A. Musgrave, H. van den Ende: Occurence of O-methylated sugars in surface glycoconjugates in *Clamydomonas eugametos* 322
W.L. Homan, H. van Kalshoven, A.H.J. Kolk, A. Musgrave, F. Schuring, H. van den Ende: Monoclonal antibodies to surface glycoconjugates in *Chlamydomonas eugametos* recognize strain-specific O-methyl sugars 328
L.J. Waldron, N. Terry: The influence of atmospheric humidity on leaf expansion in *Beta vulgaris* L. 336
M.T. Boylan, I.M. Sussex: Purification of an endopeptidase involved with storage-protein degradation in *Phaseolus vulgaris* L. cotyledons 343
C.A. Perry, R.A. Leigh, A.D. Tomos, R.E. Wyse, J.L. Hall: The regulation of turgor pressure during sucrose mobilisation and salt accumulation by excised storage-root tissue of red beet 353
W.G. Heil, H. Senger: Correlation between thylakoid protein phosphorylation and molecular organization of the photosynthetic apparatus in a dynamic system 362
E.D. Ananiev, L.K. Karagyozov, E.N. Karanov: Effect of cytokinins on ribosomal RNA gene expression in excised cotyledons of *Cucurbita pepo* L. 370
R.E. Cleland, D. Cosgrove, M. Tepfer: Long-term acid-induced wall extension in an in-vitro system 379
B. Ranty, D. Roby, G. Cavalié, M.-T. Esquerré-Tugayé: Ribulose-1,5-bisphosphate carboxylase/oxygenase expression in melon plants infected with *Colletotrichum lagenarium* 386
M.-H. Sham, D.H. Northcote: Transcription and translation of phloem protein (PP2) during phloem differentiation in *Cucurbita maxima* 392
S. Schmidt, H. Drumm-Herrel, R. Oelmüller, H. Mohr: Time course of competence in phytochrome-controlled appearance of nuclear-encoded plastidic proteins and messenger RNAs 400
G.A. Nimmo, M.B. Wilkins, C.A. Fewson, H.G. Nimmo: Persistent circadian rhythms in the phosphorylation state of phosphoenolpyruvate carboxylase from *Bryophyllum fedtschenkoi* leaves and in its sensitivity to inhibition by malate 408
K.A. Pyke, R.M. Leech: The control of chloroplast number in wheat mesophyll cells 416
M.J. Earnshaw, K.A. Carver, W.A. Charlton: Leaf anatomy. water relations and crassulacean acid metabolism in the chlorenchyma and colourless internal water-storage tissue of *Carpobrotus edulis* and *Senecio ?mandraliscae* 421

Number 4

C. Grief, M.A. O'Neill, P.J. Shaw: The zygote cell wall of *Chlamydomonas reinhardii*: a structural, chemical and immunological approach 433
C.A. McConchie, S.D. Russell, C. Dumas, M. Tuohy, R.B. Knox: Quantitative cytology of the sperm cells of *Brassica campestris* and *B. oleracea* 446
I. Häuser, K. Dehesh, K. Apel: Light-induced changes in the amounts of the 36000-Mr polypeptide of NADPH-protochlorophyllide oxidoreductase and its mRNA in barley plants grown under a diurnal light/dark cycle 453
L.M. Smith, D.D. Sabnis, R.P.C. Johnson: Immunocytochemical localisation of phloem lectin from *Cucurbita maxima* using peroxidase and colloidal-gold labels 461
I. Yordanov, V. Goltsev, T. Stoyanova, P. Venediktov: High-temperature damage and acclimation of the photosynthetic apparatus. Part I 471
V. Goltsev, I. Yordanov, T. Stoyanova, O. Popov: High-temperature damage and acclimation of the photosynthetic apparatus. Part II 478
O. Björkman, B. Demmig: Photon yield of O_2 evolution and chlorophyll fluorescence characteristics at 77 K among vascular plants of diverse origins 489
E. Mösinger, A. Batschauer, R. Vierstra, K. Apel, E. Schäfer: Comparison of the effects of exogenous native phytochrome and in-vivo irradiation on in-vitro transcription in isolated nuclei from barley (*Hordeum vulgare*) 505
P.S. Kerr, W. Kalt-Torres, S.C. Huber: Resolution of two molecular forms of sucrose-phosphate synthase from maize, soybean and spinach leaves 515
D.G. Burgess, W.C. Taylor: Chloroplast photooxidation affects the accumulation of cytosolic mRNAs encoding chloroplast proteins in maize 520
D.F.E. Richter, G.O. Kirst: D-Mannitol dehydrogenase and D-mannitol-1-phosphate dehydrogenase in *Platymonas subcordiformis*: some characteristics and their role in osmotic adaptation 528
E.A. Howard, J.C. Walker, E.S. Dennis, W.J. Peacock: Regulated expression of an alcohol dehydrogenase 1 chimeric gene introduced into maize protoplasts . . 535
H. Canut, M. Dupré, A. Carrasco, A.M. Boudet: Proteases of *Melilotus alba* mesophyll protoplasts . . . 541
P. Oscarson, B. Ingemarsson, M. af Ugglas, C.-M. Larsson: Short-term studies of NO_3^- uptake in *Pisum* using $^{13}NO_3^-$ 550
F. Rohwer, K.-H. Fritzemeier, D. Scheel, K. Hahlbrock: Biochemical reactions of different tissues of potato (*Solanum tuberosum*) to zoospores or elicitors from *Phytophthora infestans* 556
C. Domoney, R. Casey: Changes in legumin messenger RNAs throughout seed development in *Pisum sativum* L. 562
